

ENVIRONMENTAL AND PRODUCT DATA SHEET

Product

Bamboo napkin dispenser

Material

Bamboo, glue, lacquer

Packaging

Inner: no inner package

Outer: Cardboard carton

Field Of Application

A napkin dispenser for indoor use. The compartments can be arranged to fit your need.

EC Directive 94/62/EC on Packaging and Packaging Waste

The packaging complies with all essential requirements as defined by 94/62/EC.

For example minimum adequate amount of packaging, limitation of heavy metal content, recyclable through at least one of the following: reuse, material recovery, energy recovery or composting.

Environmental Aspects

Product

The product is manufactured from Bamboo.

Packaging

The corrugated board box is made from wood, which is a renewable resource.

Product Safety

Duni manufacturing units are certified according to the international quality system ISO 9001. They have also implemented the environmental management system ISO 14001.

Management Of Used Products

Recycling

Make sure the dispenser is managed in the right way after use. There is normally no wood collection system for recycling. For further details, check with the local recycling company.

Recycling of the corrugated board is possible for producing new products.

Compostability

Although natural materials, the wooden cutlery will not break down in time to be compostable.

Energy Recovery

All the materials are suited for energy recovery. Complete combustion gives mainly rise to carbon dioxide and water. The energy content of plastics/paper is comparable to that of oil/ wood.

Validity

This is a copy of a document issued 2024-05-07. It is revised when there is a change in the manufacturing process, in the product or in legislation.
