

Office seating

SAVO SOUL

Everyone has the right to **sit** as **they please**

When the elegant design of Savo Soul
catches your eye,
and you discover the subtle details
you simply need to sit down
to feel the difference.

Savo Soul – the chair that moves you.

We are **designed** for **movement!**

When we design Savo office chairs, the human body is always in focus – both physically and mentally. Everything we've learned about the importance of open hip angles and support for the body when and where it is needed, we build into our chairs. Only Savo chairs have the unique seat mechanism that allows for and stimulates movement, at the same time as giving the support you need. It's called the SAVO Floating Tilt®.

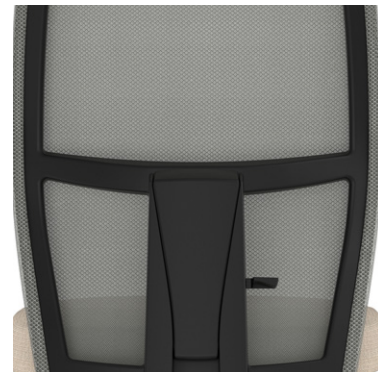

Our **design** values

SAVO Floating Tilt® gives you freedom of movement when sitting down. Aesthetics also play an important role in human well-being. Since Savo was founded in 1945 our ambition has been to take the lead in ergonomics as well as aesthetics.

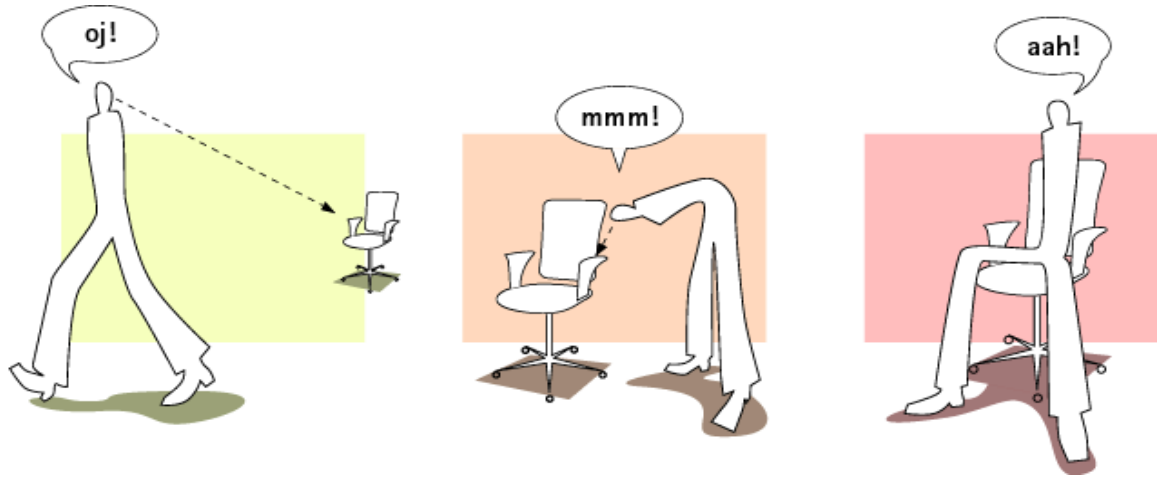

We build identity through design. Details are important when the design is simple. Identity can only be created when the product and the history behind it harmonize.

Different materials have their own personality and new materials create possibilities for a different design. By utilising soft materials for a comfortable feel, heavy duty materials for durability and metal and solid wood for a luxurious tone, possibilities are endless.

We see innovative combinations of materials and contrasts as important factors in the way we design all our Savo products.

The Savo Identity

Curiosity

Savo products are designed to stand out from the crowd and be recognised.

Admiration

The visual quality is right when the customer's attitude changes from curiosity to admiration.

Experience

The goal of the Savo experience is to build a strong relationship between the user and the product.

User Friendly

Intuitive design is always in focus.

Aesthetic

Beauty radiates from the inside out.

Meet the chair that **moves** you

"An office chair of the future should work a little like a smartphone. It should be intuitive, easy to use and suitable for all. And it must have feeling. That was our starting point, with Savo Soul. Simplicity has been the watchword all the way while ergonomics and quality has been a top priority and we could not lose Savo's soul. A real challenge that I'm proud to see the results of today!"

Savo Soul by Olle Lundberg

Olle Lundberg started his career as a designer in the late 80's. He studied industrial design at the University College of Arts, Crafts and Design in Stockholm, at the University of Essen and at Léon - les Ateliers in Paris. Since 1990 he runs his own design firm, Lundbergdesign. The design team work widely and in a multif-aceted fashion with design projects for both national and international clients. Lundbergdesign has received several international design awards such as the RedDot and IF awards.

A responsible footprint

At Savo we tread lightly on our precious globe since everything we do creates a footprint. For us, respecting the environment is a central part of a holistic responsible view.

Savo sustainability highlights:

- Recycled and recyclable materials to the greatest possible extent.
- The Swan eco-criteria as the basis for all our products.
- 10 year guarantee against manufacturing defects
- EPD ISO14025 – Environmental Product Declaration.
