

Declaration of Compliance

Description	Material	Article Number
Triple wall cup	Cardboard with PLA	198570

Duni declares that the article meets the requirements of:

- Article 3, 11(5), 15 and 17 of Regulation (EC) No 1935/2004 (Framework regulation)
- EU Regulation 2023/2006/EC (GMP)
- EU Regulation 10/2011/EC with amendments (Plastic regulation)
- German LFGB (Lebensmittel- und Futtermittelgesetzbuch) and relevant recommendations of the German Federal Institute for Risk Assessment (BfR), in particular BfR Recommendation XXXVI "Paper and board for food contact"
- EU Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols
- Article 5 of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR) regarding the restriction of per- and polyfluoroalkyl substances (PFAS) and heavy metals

Overall migration

According to the above-mentioned regulations, the overall migration does not exceed 10 mg/dm² or 60 mg/kg.

Specific migration

The material does not contain monomers or additives subject to restrictions under the plastic regulation 10/2011 and its amendments.

Area of Use

The cups are suitable for all aqueous, acidic, and alcoholic beverages, both hot and cold, under hot-fill conditions of up to 100 °C. Prolonged use may lead to leakage, particularly when the cups are used with beverages containing a high alcohol content (>20%).

Microwave use: The cups should not be used for reheating beverages in a microwave as this may compromise their stability, increasing the risk of burns.

Freezing: The items can be used for frozen food, but it is not recommended for storage in the freezer due to material properties.

Test conditions

Migration tests on the material of the article performed by an independent institute showed that under the following test conditions overall migration and specific migration fall below the respective limits given by regulation 10/2011.

Overall migration

Simulant	Contact time	Temperature	Result (mg/dm²)
10 % Ethanol	2 hours	70°C	< 10
3% Acetic acid	2 hours	70°C	< 10
Olive oil	2 hours	60°C	< 10

Ratio of food contact surface area to volume of component used to establish the compliance of material is 6 dm²/kg.

The plastic in this product does not contain additives that are subject to a restriction in food as referred to in Article 11.3 of EU Regulation 10/2011.

According to the document in our possession, Primary Aromatic Amines are below 10 ppb.

PFAS (per- and polyfluoroalkyl substances) are not intentionally being used in any step of manufacturing the cups.

To the best of our knowledge, the information provided is accurate and reliable as of the date of publication and, where relevant, reflects the information received from suppliers. It is valid from the stated issue date until it is replaced or superseded.
