Welch Allyn KleenSpec® Disposable Vaginal Specula and Cordless Illumination System— now in every size

590 SERIES KLEENSPEC® DISPOSABLE VAGINAL SPECULA ENHANCE PATIENT COMFORT

- The extra small speculum allows you to perform a comfortable exam with virginal/pediatric patients as well as postmenopausal and post-hysterectomy women—no more referrals or uncomfortable exams using metal specula or the wrong size.
- Smooth, molded acrylic designed to prevent pinching or binding of tissue for greater patient comfort or the wrong size.

HELP REDUCE CROSS-CONTAMINATION

- Single-use speculum helps to reduce crosscontamination for improved patient safety while eliminating the time and expense of reprocessing metal specs

IMPROVE STAFF PRODUCTIVITY

- Features a wider handle design for improved maneuverability and better balance during exams
- A strong grip and a yoke that's more flexible than low cost substitutes

Look for the distinctive Welch Allyn blue, green, white and yellow colored handles

"We have been using the Welch Allyn cordless Illumination system with disposable vaginal speculums for all of our patient exams since 2008 and couldn't be happier. This light is brighter than any I have ever seen and shows true tissue color. If you forget to charge the light, it is easy to grab a replacement from another room or use a spare. The light is small, easy and quick to use which truly makes us more efficient. I would recommend this system to any clinicians looking to improve the quality of their care."

Shelley Kolton, MD / Downtown Women OB/Gyn Associates / New York City, NY

KLENSPEC CORDLESS ILLUMINATION SYSTEM

- LED technology as opposed to halogen, for a whiter, brighter light and true tissue color during an exam
- No bulb replacement necessary for a reduced cost of ownership
- Features a cordless design so you'll never have to worry about cords getting in your way, breaking or needing to be cleaned, speeding the exam and giving you a full range of motion
- Push-button on/off; the illumination system easily fits into every size 590 Series speculum
- Newly designed light pipe provides a homogeneous spot and eliminates glare back so all of the light is projected forward
- Uniform spot—no dark or hot spots—for enhanced visualization of the exam area
- Produces much less heat than traditional lamps and has a continuous on time of 80 minutes
- A lithium ion battery provides a recharge time of five hours
