

Product and Safety Data Sheet

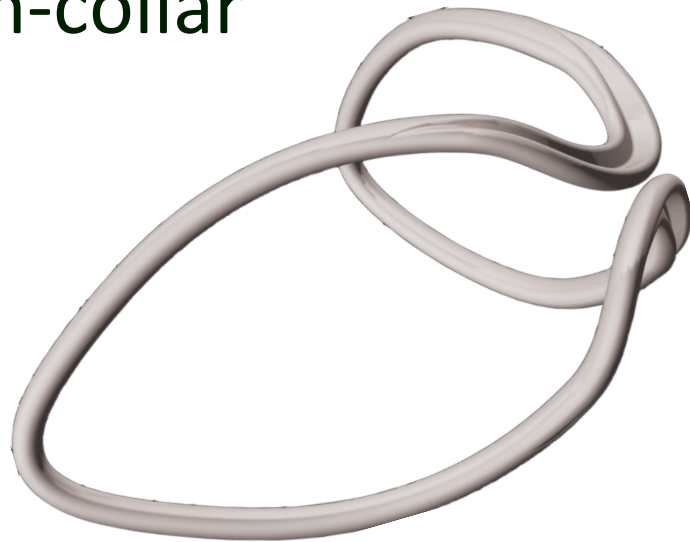

Normors Chin-collar

Rev. 1 of 4th July 2025

Part number Chin-collar LARGE 100530

Part number Chin-collar MEDIUM 101030

Please note
Normors Chin-collar
is a non-medical
product and naturally
latex free

The products on this datasheet are intended only for use on a newly deceased person, to make the first preparation of the deceased easier, and more esthetical. This product is designed for one-off use and should be recycled locally after use.

Way of use

1. The chin-collar must be put on the deceased when he/she is first made ready, before rigor mortis sets in. The deceased must lie with a little pillow under the head.
2. Make sure the smaller arch is placed under the chin. The longer arch will then lie against the breast and collarbone once the chin-collar is on.
3. Take hold of the thickest part of the chin-collar with both hands. Pull this out sufficiently and push it in towards the deceased's neck. It is important to get the chin-collar as close to the neck as possible. This may take some force.

Warning

Normors Chin-collar must not be used on deceased persons until a doctor has confirmed that death has taken place. Normors AS disclaims any liability for use of the chin-collar on living persons.

Never use Normors Chin-collar on a living person.

Note: Visible marks on the deceased may in some cases occur if the chin-collar is removed.

**Personal safety**

Use protection glasses and gloves to avoid injuries.

Compositions/Ingredients

REPRO PPH R1010: (see raw material datasheet)

Colour is added

Contains no substance classified as hazardous in concentrations according to EC directives.

Firefighting measures

The product is not classified as flammable. Principal toxicant in the smoke of burned products is as in all plastic products, carbon monoxide.

Handling and storage

Store the product in original packing away from sunlight and at temperatures not exceeding 25 degrees Celsius.

Shelf life of the product is 5 years from purchase

The product must be recycled locally. No leachate is generated in landfills. Check with local regulations.

**Environmental and recycling**

This product is not considered dangerous for the environment

This product is 100% recyclable 

Normors AS supports responsible recycling and disposal of all packaging materials and refuse.
