DECLARATION OF COMPLIANCE

We hereby confirm that the products we supply do meet the requirements put forward in the legal framework presented below.

1. DESCRIPTION OF MATERIALS AND ARTICLES PAPER DOUBLEWALL HOT DRINK CUPS [NDW]

Above mentioned paper cups are made of bleached cupboard with PE coating (inner side of the cup). The overwrap is applied (by gluing) on the inner layer made of uncoated paper, the outer layer may be printed flexo inks.

2. INTENDED USES

Products listed above can be in contact with following food stuff:

Aqueous
Acidic
Dairy
Alcohol < 6%

In following conditions of temperature and time*:
Hot-fill (Up to 70°C for up to 2 hours including 15 min up to 100°C)

The products are not intended for heating food, either in ovens or in microwave ovens. They are also not intended for cooking, they should not be eaten, they cannot be used as a toy.

** It is the obligation of the recipient of this declaration to ensure that the packaging is suitable for the aimed processing and downstream use circumstances.*

3. LEGISLATION

We confirm that the products listed in section 1 fulfill the requirements on products intended for use in contact with food as defined in:

- Regulation (EC) No 1935/2004 on materials and articles intended to come into contact with food;
- Regulation (EC) No 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food and its amendments up to date of this statement;
- Federal Institute for Risk Assessment BfR XXXVI, Paper and Board for food contact;

Huhtamaki Foodservice Poland Sp. z o.o.

NIP: 643-174 -19-74, REGON: 241-281-392, KRS: 0000334493, BDO: 000015828

- Regulation (EC) No 10/2011 on plastic materials and articles intended to come into contact with food;
- Regulation (EC) No 2025/40 article 5(4) Sum of Pb, Cd, Hg, Cr(VI) $\leq$ 100 ppm and 5(5) total fluorine (TF) result of $\leq$ 50 ppm.

Inks used for printing conforms:

- EuPIA Guideline on Printing Inks applied to the non-food contact surface of food packaging materials and articles;
- Swiss Ordinance 817.023.21 on printing inks.

4. MIGRATION

According to Regulation (EU) No 10/2011 materials and articles shall not transfer their constituents to foodstuffs in quantities exceeding 10 mg per 1 dm² of surface area of the packaging or 60 mg per 1 kg foodstuff or food simulant (limiting value of the overall migration). The ratio of food contact surface area to volume used to establish the compliance of the article/s were 1,829 dm²/240 ml.

OVERALL MIGRATION

Following migration tests were conducted:

SIMULANT	TIME	TEMPERATURE
Acetic acid 3 %	2 hours	70°C
Ethanol 50 %	2 hours	70°C

Substances with restriction

As per statements we have received from our suppliers, inks can contains some confidential substances with specific migration limit.* All SML substances were tested or evaluated by external laboratory to confirm compliance with the limits.

*Please note that inks supplier do not disclose information about SML substances without signing Non Disclosure Agreement. In case of demand of this information for the external authority, it will be available within few working days.

DUAL USE SUBSTANCES

As per statement we have received from our suppliers, products listed above may contain following Dual Use Substances: E1404, E1520, E222, E1521, E251, E330, E355, E493, E511, E513, E514, E517, E520, E524, E541, E551, E570, E900 .

5. OTHER SUBSTANCES

- Bisphenol A (BPA) - Huhtamaki does not intentionally use or add Bisphenol A to its products.
- Fluorinated substances - Huhtamaki does not intentionally use any Fluorine containing active compounds, such as PFOA and PFOS, that might be used as fat and water repellent on the surface of paper and paperboard articles.
- Non-intentionally added substances (NIAS) Under the legislation, overall migration limits of permitted substances are 60 mg/kg and unauthorized substances may be present in food contact materials, provided they do not migrate at levels above 0.01 mg of substance per kg of food. However, there is no common agreed test or methodology for NIAS evaluation. We have worked with our raw material suppliers to identify potential non evaluated substances (NES) that might be present in our products as NIAS. We have had products analyzed at an accredited laboratory for the presence of NIAS and NES. The testing has been conducted under foreseeable conditions of use, and it has been confirmed that the overall migration limit of 60 mg/kg of food was not exceeded by substances permitted under the applicable regulations. If present, NIAS and NES migrating, in amounts of more than the limiting value of 0.01 mg/kg, go through a risk assessment to confirm that the migratory of the substances in the foodstuff has an exposure below the limits and there is a low probability for adverse health effects.

6. TRACEABILITY

This can be done by referring to traceability by Licence Plate Number, Box Label, Order number.

This certificate is valid until there is substantial changes in the composition or production that bring about changes in the migration from the materials or articles or when new scientific data becomes available.
